Projects

LuxeLog • Next.js, Firebase, Tailwind CSS
luxe-log.vercel.app

- Luxury item authentication tracker with full CRUD functionality — users can submit items, attach images, update authentication status, and edit existing entries in real time
- Built a live dashboard with dynamic filtering and sorting, powered by Firestore for instant data sync across sessions

Summarist • Next.js, TypeScript, Firebase
summarist-internship-phi.vercel.app

- Book summary app featuring audio playback, user authentication, and personalized favorites — letting users absorb key insights without reading full books
- Integrated external book summary API to dynamically fetch and display content based on user selection

Ticketmaster Clone • React, TypeScript, Tailwind CSS
<https://ticketmaster-react.vercel.app/>

- Event discovery app built on the Ticketmaster API, browsing live music, sports, and theatre events across three dynamic categories
- Implemented event detail pages with real-time API fetching, skeleton loading states, and a related events carousel with smooth horizontal scrolling
- Integrated external purchase flow linking directly to Ticketmaster for seamless ticket buying

Experience

Authentication Manager

FASHIONPHILE | September 2018 - Present

- Managed daily operations of the authentication department ensuring accurate processing of high-value luxury items
- Collaborated with tech and data science teams to improve internal reporting systems and admin tools
- Developed training procedures and cross-functional workflows while managing client communications via Salesforce

About me

Frontend developer transitioning from 8 years in luxury e-commerce operations at Fashionphile, one of the largest resale platforms in the US. What started as deep product knowledge has evolved into building the tools I once used — polished, functional web applications with React, Next.js, TypeScript, and Firebase. I bring a rare combination of technical ability and real-world domain expertise, with a genuine passion for clean, user-focused interfaces.

Technical Skills

Languages & Frameworks:

React, Next.js, JavaScript (ES6+), TypeScript, HTML, CSS

Styling & Tools:

Tailwind CSS, Firebase, Firestore, REST APIs, Git, GitHub, Vercel

Education & Certifications

Frontend Development Program • Frontend Simplified

2025-2026

B.S. in Mass Communication • Virginia Commonwealth University

2014-2017
